

Dr. Richard Cash

Richard A. Cash, MD, MPH is Director of the Program on Ethical Issues in International Health Research in the Department of Population and Global Health at the Harvard School of Public Health (HSPH). Currently he is in India as a Visiting Professor at the Public Health Foundation of India. As Director of the Program on Research Ethics he has overseen the training of international fellows, co-directed a summer workshop at HPSH on research ethics, and been involved in conducting over 45 workshops on research ethics in 11 countries. He's the co-editor of the WHO publication "Casebook on Ethical Issues in International Health Research". Dr. Cash began his career in international health 45 years ago at what is now the ICDDR,B in Dhaka, Bangladesh where he and colleagues conducted the first clinical trials of Oral Rehydration Therapy (ORT) in adults and children. Other studies included the first field trials of ORT and the use of amino acids as substrates. Throughout his career, he has worked on international health programs that stressed implementation, training, and capacity building. He presently has visiting faculty appointments at the Achutha Menon Centre in Trivandrum, the James P. Grant School of Public Health at BRAC University in Dhaka, the University of Nagasaki, and PHFI. Recently he and his colleagues published "From One to Many: Scaling Up Health Programs in Low-Income Countries" and "Making Tuberculosis History" which described a DOTS program that covers a population of 100 million. In January 2007, he was presented the Prince Mahidol Award in Public Health given by Thailand for his work on ORT and in 2011 he received the Fries Prize for Improving Health.
