Consultant / Developer IT –CPHC

National Health Systems Resource Centre (NHSRC), New Delhi is seeking applications from qualified candidates for the above mentioned post purely on contractual basis.

If you have a commitment to health equity and excellence, here is a unique chance to work with a team committed to shaping the public health landscape in India. The positions offers you an opportunity to actually participate in the process of strengthening health systems, improving health service delivery and enabling positive health outcomes, through hands on implementation assistance at national, state and district levels. Working with a trans disciplinary team, you can discover, adapt, co-create and disseminate solutions to multiple challenges related to service delivery systems, universal primary health care, human resources for health, community processes, health financing, quality of care, public health planning and health promotion. This is an opportunity to support health systems strengthening at scale, learn from district and sub district implementation, undertake knowledge translation, and enable realization of the vision of universal health coverage.

The Consultant/ Developer shall have excellent knowledge and sound experience in developing web based applications on PHP platform. He / she shall bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Roles & Responsibilities:
- Develop new user-facing features
- Build reusable codes and libraries for future use
- Optimize application for maximum speed and scalability
- Assure that all user input is validated before submitting to back-end
