

Introduction to Emergency Care For FLW

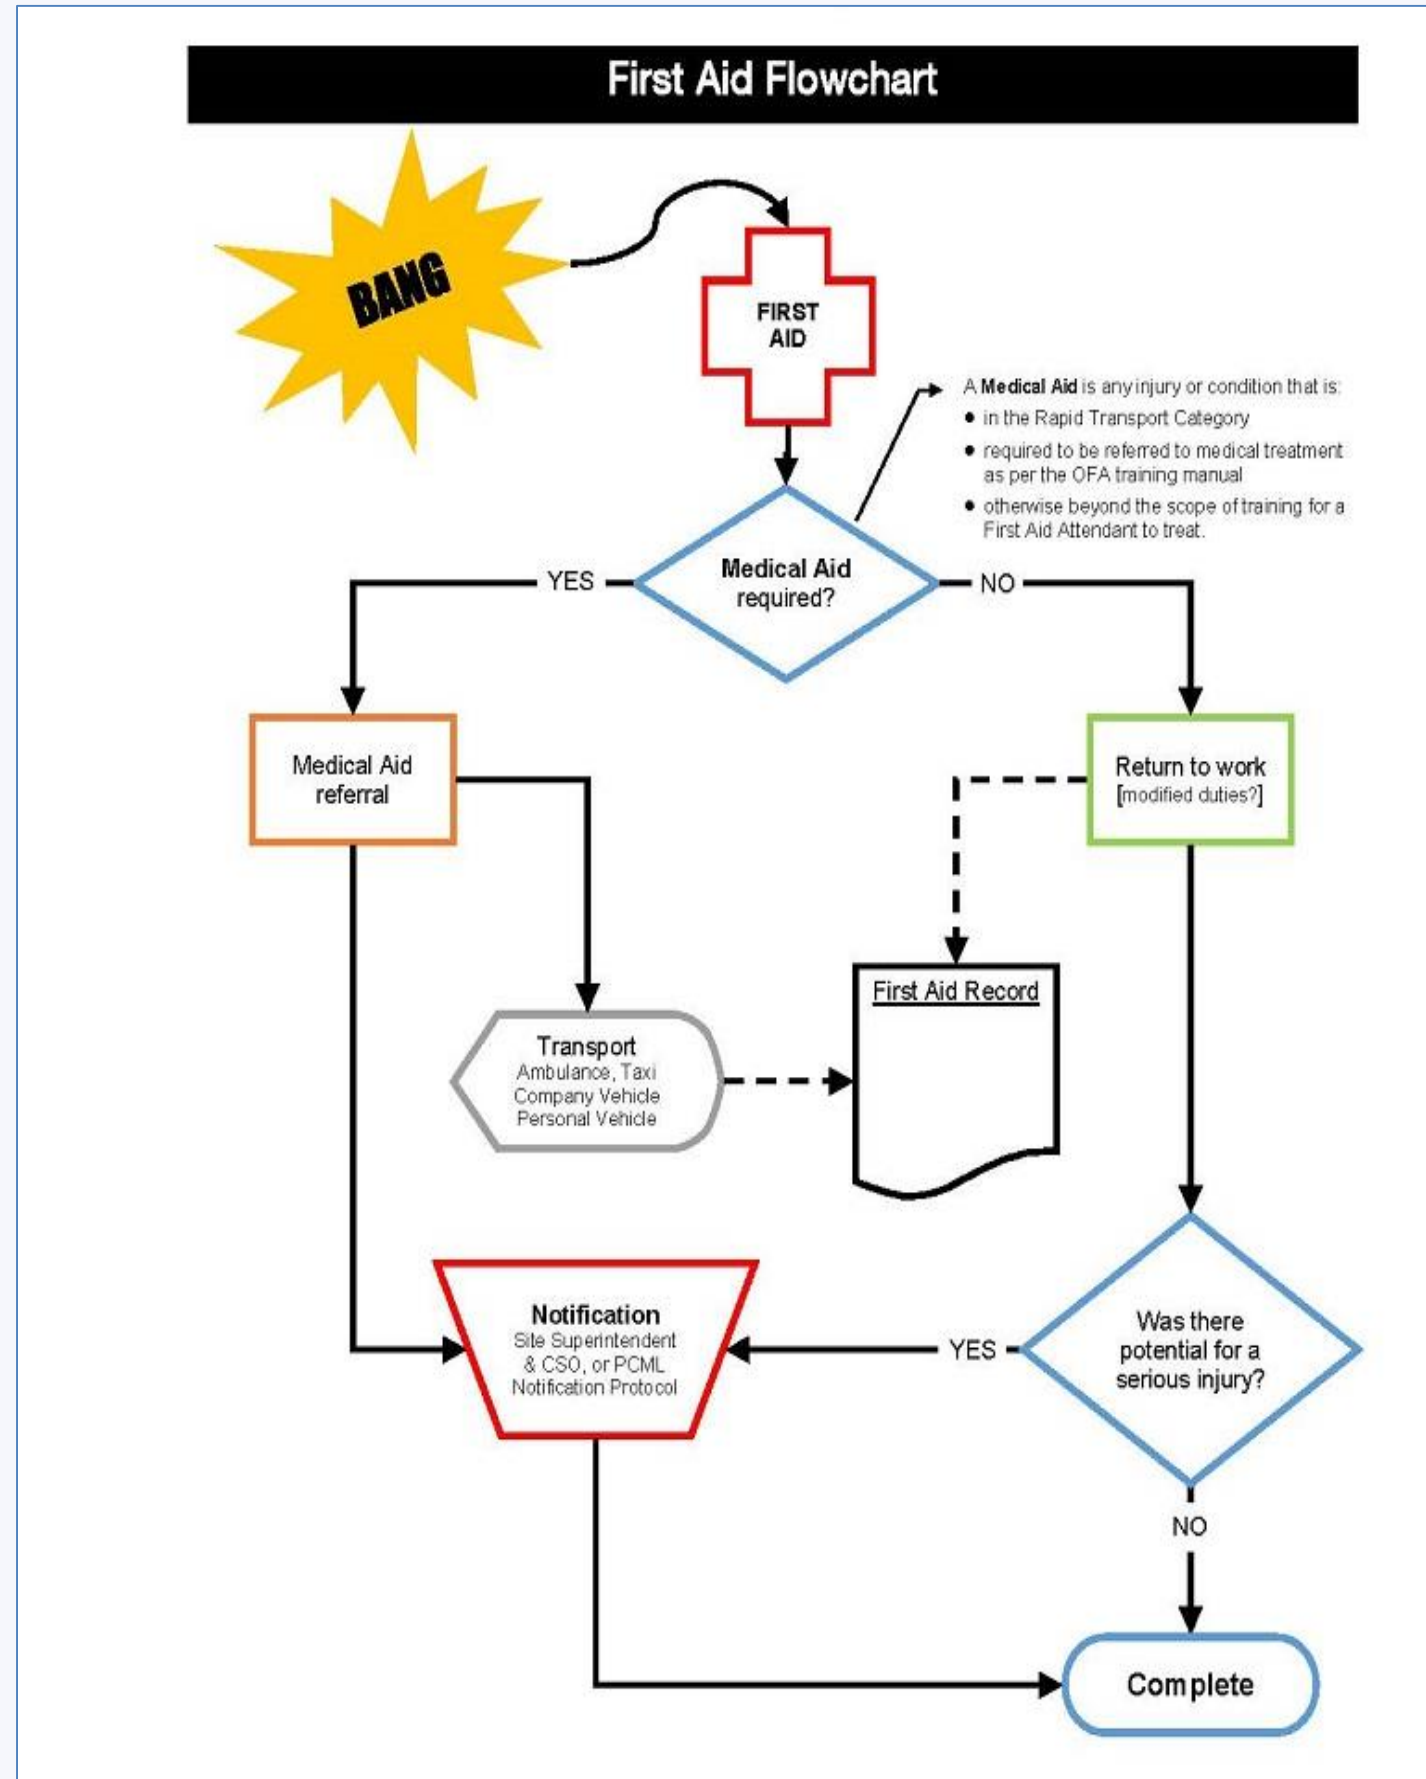

INTRODUCTION

- Ayushman Bharat Health and Wellness program -Comprehensive Primary Health Care to the communities.  Emergency and trauma care services
- Require immediate medical care  reach an appropriate health facility for treatment within an hour.
- These conditions are life-threatening  right care at the right time.

INTRODUCTION

- A common example is an accident leading to severe bleeding or a person suffering a heart attack
- The broad goal of emergency care is to intervene as quickly as possible to avoid life-threatening morbidity and death in emergency and trauma cases.
- Give examples from your village?

WHAT IS AN EMERGENCY?

An emergency is any condition that threatens the life or well-being of a person. A health emergency comprises a range of conditions which may pose a threat to life and require immediate medical care.

E.g. accidents and trauma

Trauma is one of the most common emergencies that occur in the community and a major reason for morbidity and mortality in India.

WHAT IS EMERGENCY CARE?

Emergency care refers to the care provided to the victim in the 'Golden Hour' (usually the hour following an accident) before/while reaching the appropriate health facility, in order to prevent death or serious disabilities.

ASHA MPW

ANM/MPW-M can play a crucial role in identifying and seeking help for emergency which include carrying out initial assessment, identifying life-threatening conditions, initial management and arrangement of referral transport as needed

ANM/MPW-M shall also support the ASHA in raising awareness regarding health emergencies and their prevention in the community.

ANM shall assist the CHO in basic care management of emergency cases at the SHC-HWC.

EVALUATION

1) The focus of emergency care is to life and prevent.....

2) STATE TRUE OR FALSE

a) The golden hour is the first hour after reaching the hospital.

b) ASHA helps the CHO with emergency care in the HWC

c) MPW supports ASHA for health promotion in preventing trauma
